

# Lowering the Cost & Complexity of Cancer Through Comprehensive Oncology Management

Focused 100% on oncology, no other company has the depth and breadth of oncology expertise to support plans with a comprehensive oncology management solution that delivers value and improved outcomes for you, your oncology network, your customers, and the members who have entrusted you with their healthcare. OncoHealth's market-leading software and services platform combines oncology value management services with virtual cancer care to ensure your members with cancer are getting the most appropriate treatment and support through the duration of their treatment with services including 24/7 oncology nursing, mental health, nutrition, and resource navigation.

## Trusted Solution to Control Costs and Improve Quality

OneUM™ by OncoHealth is the only solution built exclusively for oncology that integrates medical benefit drugs, pharmacy benefit drugs, radiation therapy procedures, and genetic testing. OneUM leverages the highly scalable, cloud-based OncoHealth hub to deliver a customizable, tech-enabled white-glove service for your patients and providers.

- A single process for medical and pharmacy benefit drugs, radiation therapy, and genetic/molecular testing
- National Comprehensive Cancer Network (NCCN) guidelines supplemented with emerging research
- Smart disease- and treatment-specific data capture
- Preferred regimens give providers transparency and guide treatment planning based on efficacy and safety
- Near real-time approvals with oncologist-to-oncologist peer review as needed
- Extensive configurability for plan- and line of business-specific rules

## Insights and Expert Support to Guide Decision Making

The most effective strategies are informed by real-world data and evidence, guided by industry expertise. OncoHealth's Oncology Insights™ is an analytics package that allows you to understand your oncology costs and utilization and identify opportunities for savings through comparison to our industry-leading national benchmarks. Together with our oncology-focused clinical expertise, Oncology Insights delivers complete visibility into oncologist practice patterns, cancer drug trends, and treatment and decision-making patterns.

Working with OncoHealth provides access to real-time review and benchmarking against HIPAA-compliant de-identified data sets to help plans understand trends to be able to create the right cost- and care-management strategies. Our multi-disciplinary advisory team consisting of board-certified oncology pharmacists and clinical analysts will also work with you to help interpret the data, surface immediate actionable insights, and provide recommendations to close gaps and improve oncology programs.

OncoHealth provides you the tools and independent expert support to stay informed about trend and performance so that you can evaluate and adapt your programs and oncologist engagement as necessary.

## Personalized Cancer Program to Support Your Members

Iris by OncoHealth provides virtual care to people with cancer and their caregivers, offering direct access to licensed oncology providers along with personalized guidance based on cancer type and treatment. Our comprehensive cancer support and care management program Iris helps your members as they navigate the physical and psychosocial effects of cancer and its treatment.

Our focus is on delivering holistic and accessible support for the moments in between visits with a primary oncologist, helping reduce unnecessary emergency department visits and hospital admissions and improving quality of life.

**Address real-time symptom management with 24/7 access to oncology nurses**

**Manage cancer-related psychosocial challenges with mental health visits**

**Proactive monitoring and outreach**

**Receive personalized nutrition education with an oncology dietitian.**

Iris provides plans an additional, innovative benefit for self-funded employers.

OncoHealth is dedicated to using technology and data to make cancer treatment less complicated and more effective. Let's work together to navigate the complexities of cancer care.
