

*With Iris, you're supporting employees in navigating their cancer experience while achieving better outcomes and cost control for your employer.*

Iris by OncoHealth® is a comprehensive oncology support and navigation solution that enhances quality of life, improves outcomes, and helps manage the complexities of cancer care for individuals with cancer and their caregivers. Designed to complement primary oncology care, Iris provides continuous guidance between appointments and after-hours, reducing gaps in care.

## Adding Iris to your employers benefits offers employees:

- Enhanced access to tools and expertise for managing side effects
- Faster, more accurate assessments of potential complications
- Improved emotional well-being and coping skills
- A strong support system to guide them through their cancer experience

## And for your employer, that means:

- An elevated employee experience
- Reduced absenteeism and presenteeism
- Fewer emergency department visits and hospitalizations
- Better outcomes and improved quality of life
- Lower total cost of cancer care
- Outcomes reporting for eligible employer groups

## Cancer's Impact on Your Employers May Be Greater Than You Think

**#1** Cancer tops healthcare spend for U.S. employers and spending continues to rise

**70%** of employees with cancer miss four weeks or more of work

Employees with cancer struggling with presenteeism can cost employers an estimated **\$3,922** per employee annually

**56%** Avoidable ED usage for cancer patients

Iris by OncoHealth® is a comprehensive cancer support and navigation solution designed for individuals with cancer and their caregivers. Complementing primary oncology care teams, Iris provides continuous support between appointments through licensed oncology experts—including nurses, mental health therapists, and dietitians. Accessible via web, smartphone app, or phone, Iris offers 24/7 cancer care, emotional support, nutrition guidance, and educational content to address the challenges of cancer.
