OH UM 68 – UM Review Criteria

OVERVIEW

OncoHealth performs prior authorization reviews for contracted clients' commercial, Managed Medicaid, and Medicare Advantage products. Organization and Coverage determinations may be directed, where applicable, by the Centers of Medicare & Medicaid Services (CMS) Medicare Benefit Policy Manual, Chapter 15 or the Medicare Prescription Drug Benefit Manual, Chapter 6. National Coverage Determinations (NCD) or Local Coverage Determinations (LCD) may exist for which compliance is required. Determinations may also be directed by state-specific Medicaid drug utilization requirements and/or health plan specific drug coverage policies.

PURPOSE

To establish coverage criteria for antineoplastic agents, cellular therapies, biologics, immunotherapies, targeted therapies, and oncology supportive care drugs administered under the medical or pharmacy benefit when a drug-specific coverage policy does not exist or the requested use falls outside established drug-specific criteria.

SCOPE

OncoHealth reviews antineoplastics, cellular therapies, biologics, immunotherapies, and targeted therapies, when used in the treatment of cancer. Additionally, OH reviews select drug(s) from other classes when used to treat or support patients on active cancer treatment. Authorization requests, include, but are not limited to the following therapies used in oncology:

- Cytotoxic chemotherapies
- Immunotherapies
- Targeted therapies

- Monoclonal antibodies
- Cellular therapies
- Supportive care agents

POLICY STATEMENT

Coverage may be approved when the requested therapy is considered medically necessary, reasonable, and is supported by nationally recognized oncology compendia, FDA-approved labeling, and federal and state specific guidance, where applicable.

POLICY AND CLINICAL INDICATIONS

An oncology treatment or supportive care agent may be medically necessary when ALL of the following criteria are met:

- The drug(s) is (are) approved by the FDA for use in humans; **AND**
- The treatment request is supported by at least one of the following for the specific clinical situation under review (stage of disease, line of therapy, combination of drugs, performance status, comorbid conditions, absence of contraindications):
    - United States Food and Drug Administration (FDA);
    - NCCN Category 1 or 2A level of recommendation in the current applicable NCCN Clinical Practice Guideline or NCCN Drugs and Biologics Compendium;
    - NCCN Category 2B level of recommendation if there is no higher rated NCCN Category recommendation available;
    - Clinical Pharmacology (Strong For);
    - American Hospital Formulary Service Drug Information (AHFS DI) (Level 1);
    - Thompson Micromedex DrugDex® (Class I, IIa, or IIb);
    - Wolters Kluwer Lexi-Drugs® (Level A);
    - In the absence of support listed above, OH clinician may consider other uses of drugs and biologics medically necessary if supported as safe and effective according to fully published, high-quality, peer-reviewed articles (**meeting abstracts and case reports are excluded from consideration**); **AND**
- Prescribed by or in consultation with oncologist/hematologist or other board-certified prescriber with qualifications to treat the specified malignancy; **AND**
- The treatment request is submitted with clinical records to support the medical necessity and/or reasonableness of treatment (oncology progress notes, pathology, imaging, lab/biomarker/genomic testing, treatment history, etc.); **AND**
- The individual has not experienced disease progression, lack of efficacy, or unacceptable toxicity on the same drug(s), drug in the same pharmacologic class, or drug with same mechanism of action as the requested drug unless supported by the NCCN or high quality literature (prospective phase 2 or 3 studies published as full manuscripts in a CMS-supported journal); **AND**
- If applicable, trial and failure of preferred products as outlined in client specific preferred product policy

RENEWAL CRITERIA

Continued treatment of an oncology treatment or supportive care agent may be considered medically necessary if the following criteria are met:

- Clinical benefit has been demonstrated (provider assessment, applicable labs, applicable imaging); **OR**
- Disease stabilization or response is documented; **AND**
- Toxicity is manageable; **AND**
- Ongoing treatment remains medically necessary; **AND**
- The individual's treatment has not exceeded label or supported off-label recommended quantity or duration limits

AUTHORIZATION DURATION

Authorizations are issued for 6 (six) months, unless the ordering physician requests a different timespan or the patients' unique circumstance or condition supports the medical necessity for a different authorization timeframe.

EXCLUSIONS

Coverage may be denied for:

- Duplicate therapy without justification
- Non-evidence-based treatment
- Therapies exceeding recommended dosing and/or frequency without rationale
- Treatment that is inconsistent with formulary or utilization management requirements
- Experimental or investigational indications outside of the scope of a clinical trial

WITHDRAWN, DISCONTINUED, OR NON-MARKETED THERAPIES

Cytotoxic drugs, biologics, targeted therapies, or supportive care drugs that have been withdrawn from the market, discontinued by the manufacturer, or removed from FDA approval may no longer be eligible for coverage under this policy.

DRUG SHORTAGE CONSIDERATIONS

When a medically necessary oncology therapy or supportive care agent is impacted by manufacturer shortage, supply disruption, or unavailable inventory, OH may allow clinically appropriate alternative therapies, therapeutic substitutions, or temporary exceptions to utilization management requirements.

DISCLAIMER

Drug Coverage Policies are developed as needed, reviewed and updated at least annually, and are subject to change. Other policies and coverage determination guidelines may apply. Federal and state regulatory requirements and member specific benefit plan documents, if applicable, must be reviewed prior to utilizing this Drug Coverage Policy. This Drug Coverage Policy is for informational purposes only and does not constitute medical advice nor dictate how providers should practice medicine. This policy should not be reproduced, stored in a retrieval system, or altered from its original form without written permission from OncoHealth, Inc.

Coverage determinations require documentation demonstrating medical necessity. All supporting records must be available upon request. Failure to provide documentation may result in denial of services.

APPENDIX

Medications covered under this policy include, but are not limited to, the following medications that are within scope for OncoHealth review. Inclusion of a code does not constitute or imply that a client has delegated determination authority to OncoHealth, nor does it guarantee individual member coverage or provider reimbursement. Coverage is determined by the member's specific benefit plan document and applicable laws governing coverage of services.

This list is to be updated at least quarterly and may also be reviewed on an ad hoc basis as needed.
